Our mission is healthy light

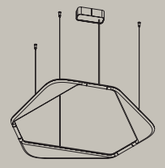

The ILUM brand fullfills its mission by delivering unparalleled lighting projects that prioritize human comfort in both work and leisure environments. Our cutting-edge approach to design creates innovative and health-conscious lighting for everyday life. The key factors shaping ILUM's brand are deeply rooted in the surrounding nature. Crafted by eminent designers for designers, our brand stands at the forefront of the contemporary lighting industry, collaborating with revered figures in the design scene. Our product portfolio boasts distinct individuality, with each project showcasing unique characteristics.
The Ogi family draws inspiration from timeless Japanese culture, while the enigmatic Juicy is adorned with minimalist hats, and the sophisticated Stellar beckons with its enchanting natural veneer. Beyond aesthetics, each product stands out for its advanced technology tailored to the specific needs of each family. The seamless integration of technological innovation, original design, and unwavering quality creates truly natural lighting that enhances daily comfort for humans, making ILUM a reliable source of daily well-being.

Gorget
Collection
Designed by Karim Rashid

Shining star

The Gorget, designed by Karim Rashid, is inspired by the French word „gorge," which refers to the throat and recalls a band of linen worn around a woman's neck and head during the medieval era. Its sleek, futuristic design is rooted in modular elements that come together to form our collection. Comprising interlocking rings (constellation) that can be woven into captivating hanging sculptures, a linear system ideal for accentuating corridors and hallways, and sconces to adorn walls wherever they are desired, the Gorget embodies versatility and aesthetic refinement.

Sculptural Identity

Gorget is a collection defined by its sculptural silhouette and refined light expression. The irregular, softly contoured geometry creates a distinctive visual identity, allowing each luminaire to function as both a source of illumination and a spatial feature. The system offers a wide range of configurations from linear arrangements to more complex compositions supporting projects of varying scale and character. Carefully balanced proportions and precise detailing ensure a consistent aesthetic across all variants.

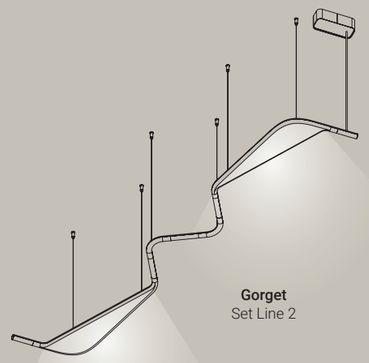

Gorget
Set Line 2

Atmosphere in Motion

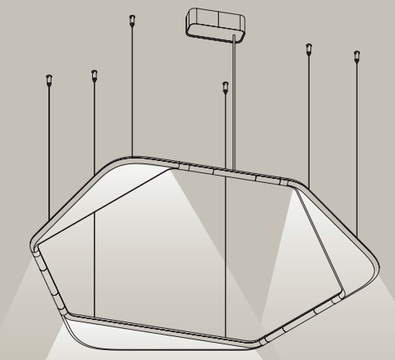

Gorget transforms space through a delicate interplay of light and form. Suspended above architectural surfaces, it creates a soft, ambient glow that enhances depth and texture within the interior.The elongated profiles and subtle transitions in geometry introduce a sense of movement, making the lighting feel alive yet controlled. Whether used as a central feature or integrated into a broader scheme, the collection contributes to a calm, sophisticated atmosphere. This is lighting that quietly shapes experience—without overwhelming the space.

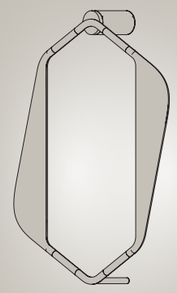

Gorget
Set Line

A range of possibilities

The Gorget Set Line redefines the idea of linear lighting by introducing a sense of flow and direction. Its irregular, evolving profile breaks away from rigid geometry, creating a line that feels intuitive and naturally integrated into the space. Designed to accompany movement, it performs particularly well in transitional areas, subtly leading the way and enhancing spatial navigation. The light can be emitted both upwards and downwards, adding depth while providing balanced illumination across surfaces. This dual character—expressive yet functional—allows the system to shape interiors with clarity, rhythm and a distinct visual signature.

Gorget | Set Line 1 | Volcano

Gorget | Set Line 3 | Gold

Guiding Light

The Gorget line takes the concept of a linear system to the next level. Its irregular, unique shape will work perfectly in corridors and hallways, where it will guide the recipient to their destination with light. Light can be emitted both upwards and downwards, providing both a decorative effect on the wall and functional floor lighting. A subtle, continuous line of light enhances the form, delivering evenly distributed illumination that complements contemporary interiors without dominating them.

Gorget | Set Line 3 | Cream white

Constellation Expression

The constellation series highlights the expressive potential of Gorget's geometry. Individual forms come together to create layered compositions that appear both structured and effortless. The interplay between illuminated edges and shadowed surfaces gives each piece a sense of depth, reinforcing its sculptural quality. Despite their presence, the luminaires remain visually light, maintaining balance within the composition. This approach allows light to act as both structure and accent—defining zones while preserving openness.

Balanced Illumination

Designed to perform as well as to impress, Gorget delivers comfortable, evenly diffused light—ideal for spaces that require both clarity and atmosphere. The form naturally directs the light downward while maintaining a soft peripheral glow, supporting visual comfort without harsh contrasts. The result is a balanced environment that feels inviting and composed. Its understated elegance makes it suitable for refined interiors where every element contributes to a cohesive whole.

Gorget | Constellation 2 | Volcano

Reflected light

The collection is complemented by a wall sconce. The sconce features a mounting box made of brushed aluminum, adding character and elevating it to the highest standards. The lamp casts a warm, expansive glow onto the wall, enhanced by our original colors, sure to capture attention. The Gorget wall sconce is available in two sizes and consumes half the power of the suspended versions.

Gorget | Wall 2 | Night

Gorget | Wall 1 | Ceiling box

Seamless Extension

The wall-mounted versions extend the Gorget collection into vertical applications, preserving its signature geometry while adapting it to a new context. Slim proportions and precise mounting solutions ensure a clean integration with architectural surfaces. The light is gently diffused, creating a subtle halo effect that enhances walls without overwhelming them.These variants allow for continuity throughout the project, maintaining a unified design language across different lighting layers.

Kone

Single

Designed by Karim Rashid

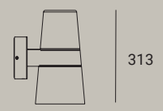

Technology meets craftsmanship

The Kone Single collection is a harmonious blend of modern geometry, glass, and aluminum, bringing an elegant and timeless character to any interior. Its minimalist form and refined details make Kone lamps not only functional lighting solutions, but also stylish design elements. The series is available in two distinctive versions. Kone Single features a smoked glass shade that creates a moody lighting effect, while Kone Double and Double Mini are equipped with frosted shades that gently diffuse the light and create a warm, inviting atmosphere. A wide range of fixtures allows the Kone collection to seamlessly complement various spaces and interior styles.

Unified Design Language

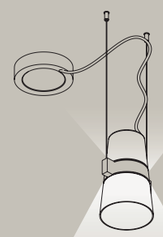

Kone is conceived as a versatile system that seamlessly extends across suspended, ceiling-mounted and wall-mounted applications. Despite the diversity of formats, each element shares a consistent geometry and proportion, ensuring a cohesive visual identity throughout the space. This continuity allows the lighting to move effortlessly between different layers of the interior, creating a unified composition where every point of light feels intentional and connected.

Atmosphere in Every Level

Combining two types of lighting in one collection enables you to shape space with precision, infusing each area with its own distinctive ambiance. Whether through soft ambient light or focused spotlights with delicate hues in colours like amber, warm white or blue. Our collection empowers you to craft the perfect atmosphere for every occasion. Timeless materials were combined with great colors and finishes. Our extensive color palette of powder-coated metals ensures a perfect match for any aesthetic.

Sculpted Light

The geometry of Kone is designed to guide light with precision. Controlled distribution creates a clear distinction between illuminated zones and surrounding shadow, enhancing depth and spatial definition. This refined contrast introduces a subtle sense of drama while maintaining overall visual calmness.

The lighting can be smoothly dimmed down to very low levels, allowing the character of the luminaire to evolve throughout the day. At reduced intensity, the emission becomes softer and more diffused, transitioning into a subtle halo effect that gently outlines the form.

Kone | Single One | Marrone

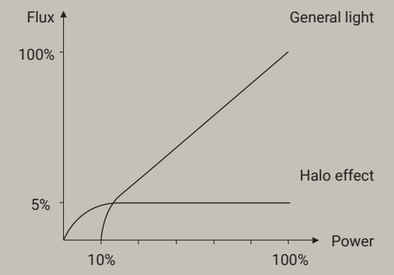

Kone | Single Three | Black dust

Refined Focus

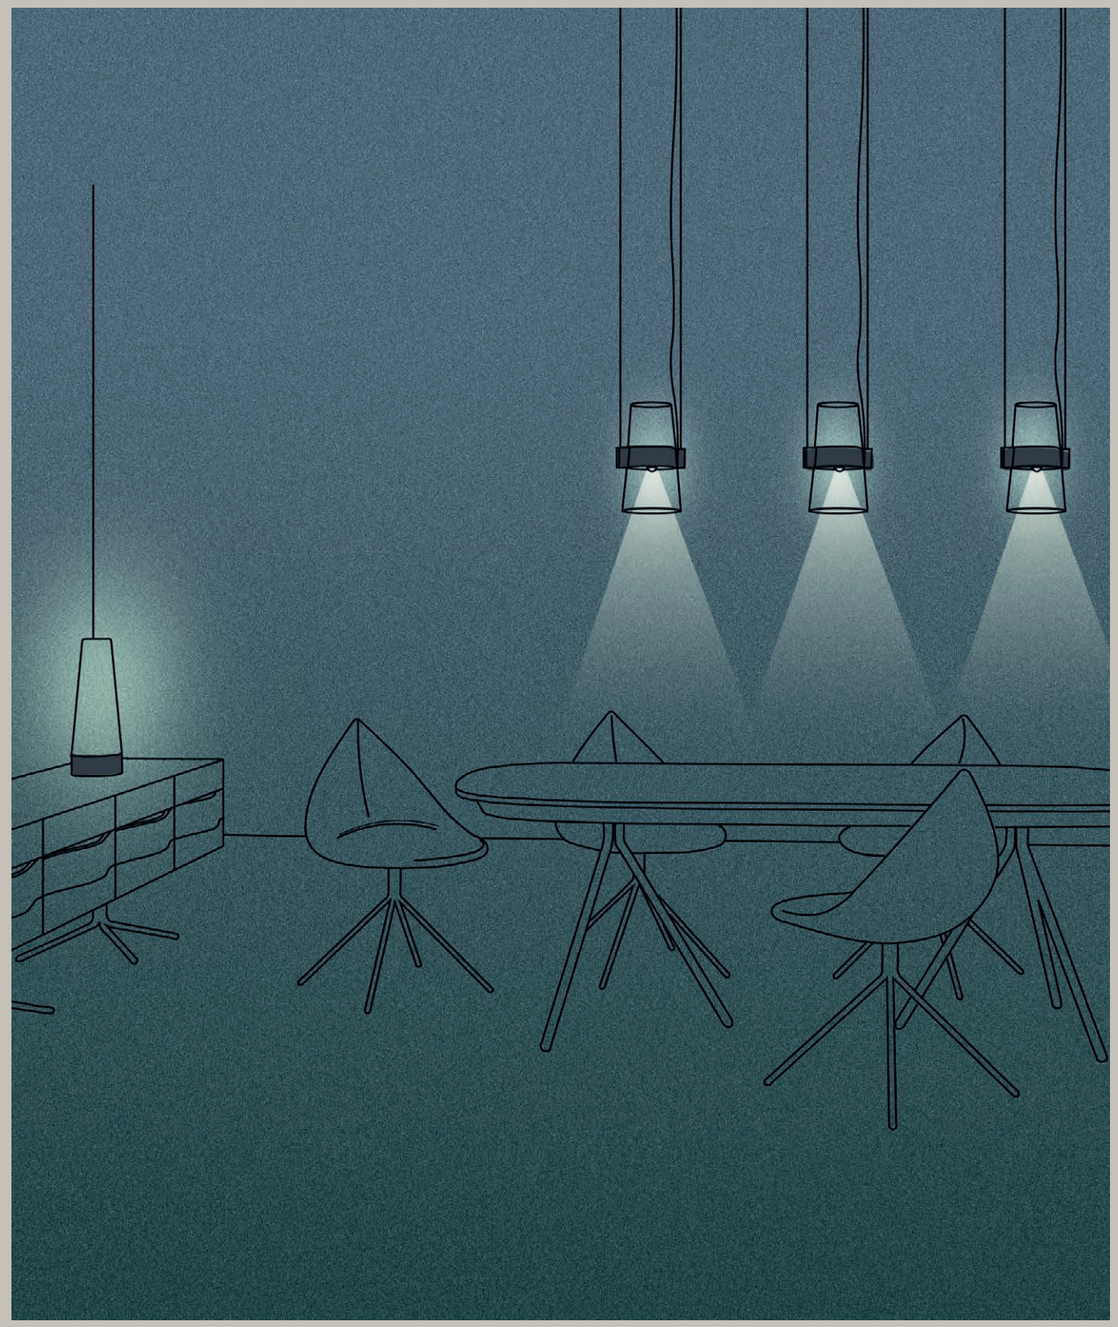

Kone Single brings precision and atmosphere into one elegant gesture. Suspended above tables, counters or passageways, it creates a focused layer of light while adding a distinctive visual accent to the interior. The smoked glass gives the luminaire subtle depth and reflection, while the integrated halo effect introduces an atmospheric glow available in Amber, Blue or White. Used individually or in a sequence, Kone Single defines the space with rhythm and clarity, making every arrangement feel intentional, expressive and beautifully balanced.

Constant Power

When dimmed adjustable general light below 10%, the luminaire stays only with halo effect in amber, blue or warm white color — a soft ambient glow that consumes virtually no power.

Kone

Double

Designed by Karim Rashid

Dual Styles

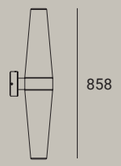

The Kone Double series is a modern lighting collection featuring wall lamps, suspended lights, and table lamps designed to create a cohesive interior arrangement. Its minimalist design and elegant details make the collection a perfect fit for both residential and commercial spaces. For smaller interiors, the compact Kone Mini version was created, ideal for more intimate arrangements. Kone Double and Double Mini lamps are also available with a frosted shade that gently diffuses the light, creating a warm and atmospheric ambiance.

Vertical Elegance

Kone Double functions as a functional work of art. Designed for large open spaces, it captures attention with its ambient light and a with specially selcted frotsed glass and color finishes. This versatile lamp not only illuminates but also enhances the aesthetic appeal of any room. Additionally, a smaller version was created to suit residential and smaller commercial spaces, ensuring that the elegance and functionality of Kone Double Mini can be enjoyed in any setting. The Kone table elevates your space with its distinctive flair and atmosphere. Crafted from quality materials and featuring an original design, it serves not only as a functional piece but also as a beautiful decorative object. Its fusion of simplicity and character ensures it remains a timeless addition to your décor.

Material Harmony

Kone Table explores the relationship between light and material through carefully balanced finishes. The use of frosted glass introduces a soft diffusion, transforming the light into a calm and evenly distributed glow. In contrast, the precisely defined metal structure adds clarity and definition to the overall form. This combination creates a refined interplay of softness and precision, giving the luminaire both presence and subtlety.

Light Compositions

Kone Double Mini introduces a lighter, more flexible approach to building lighting compositions. Smaller in scale yet consistent in form, it allows multiple elements to be combined into clusters that feel natural and effortless. Suspended arrangements create a sense of depth and variability, bringing a soft spatial dynamic without imposing rigid structure. Each composition remains visually cohesive, while offering the freedom to shape lighting in a more intuitive way. This approach makes it possible to create arrangements that feel both refined and relaxed perfectly balanced between precision and ease.

Style with a soul

Retro is a decorative wall light that combines inspiration drawn from classic design with a modern approach to light and detail. Its distinctive, convex form draws the eye, while the transparent diffuser gives the fixture an elegant, subtly nostalgic appearance. This product has been designed for interiors where lighting serves not only a functional role but also helps to build atmosphere and emphasise the style of the arrangement. It is a proposal for those seeking lighting with character — a fixture that does not dominate the space but visibly enriches it. Retro brings a vintage mood into the interior in an elegant, contemporary form, blending decorative quality, functionality and timeless aesthetics.

Three faces, one story

The fixture is available in three diffuser variants: Smooth, Radial and Grid. Each gives the wall light a slightly different character — from the more subtle and minimalist, through dynamic and decorative, to a technical, graphic accent. Thanks to this, Retro can easily be adapted to a wide variety of interior design projects: private, commercial, hotel, restaurant and residential apartment settings.

Ogi

Touchless Control

When we design our lamps, we think about more than just what they are supposed to illuminate. We care about building the overall experience of light in a room. In addition to the main light source pointing downward, pendant lamps also have additional light beaming upward, illuminating the ceiling. Similarly, wall sconces - they shine on the wall, but also on the ground. The combination of the two effects results in a more balanced and welcoming environment in the room. In addition, the pendant lamps and the table lamp are equipped with the “dim to warm” touchless light control function.

Design for the senses

Ogi was designed to captivate the senses with its interplay of light and shape. Its sculptural form comes in various sizes, allowing for captivating compositions that enhance any environment. Distinguished by its ‚dim to warm' technology, this fixture smoothly transitions light, providing both vibrant brightness and a soothing, warmer ambiance. The gradient light feature softly illuminates, casting an enchanting glow adjustable to create the desired atmosphere. Adding to its allure is a delicate upward string of light, a subtle yet mesmerizing detail that enhances its visual appeal. This fixture surpasses mere illumination; it offers a transformative experience that infuses sophistication and charm into any space.

Ogi | 60 Suspended | Marrone

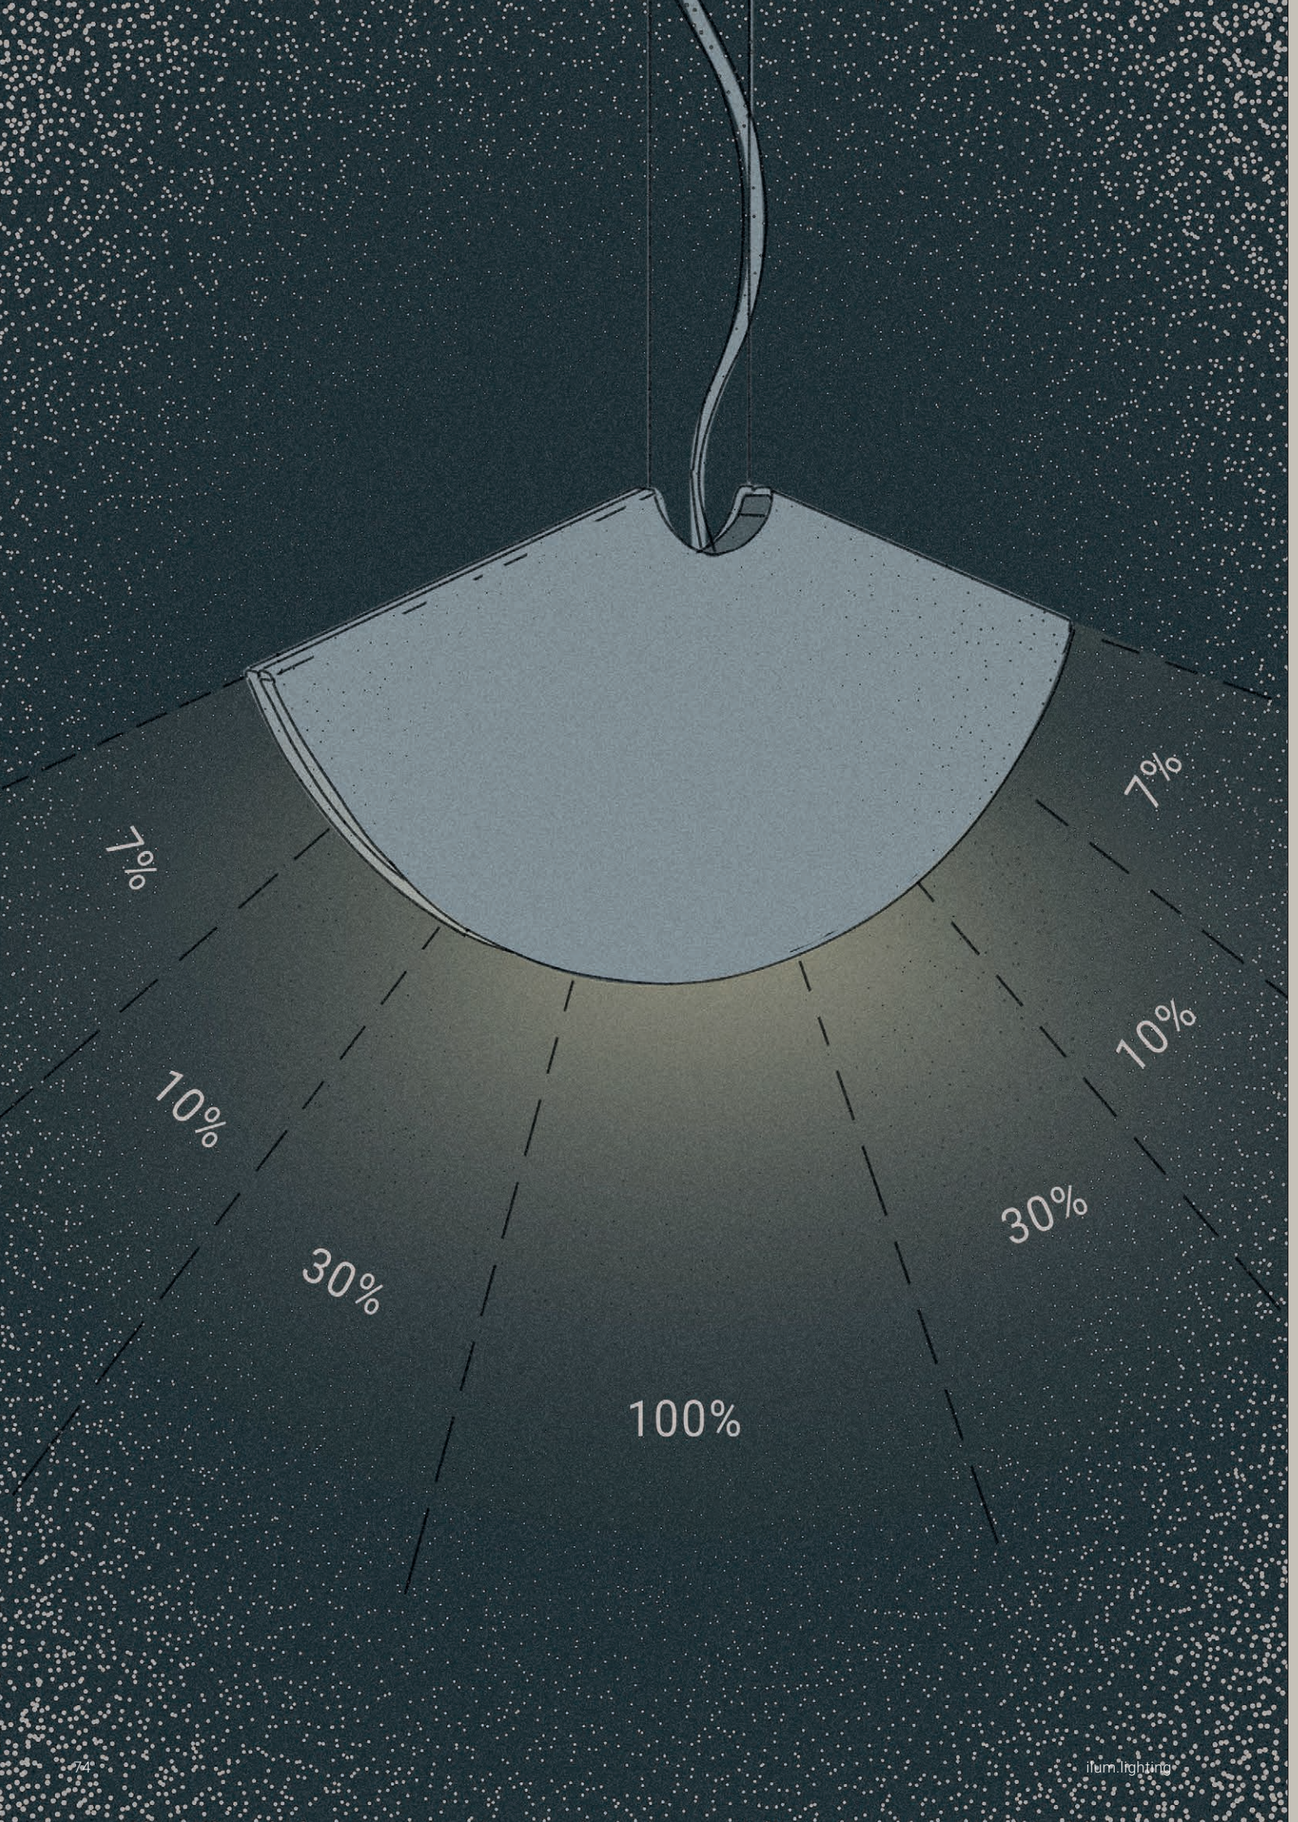

Ogi | 60 Suspended | Sage

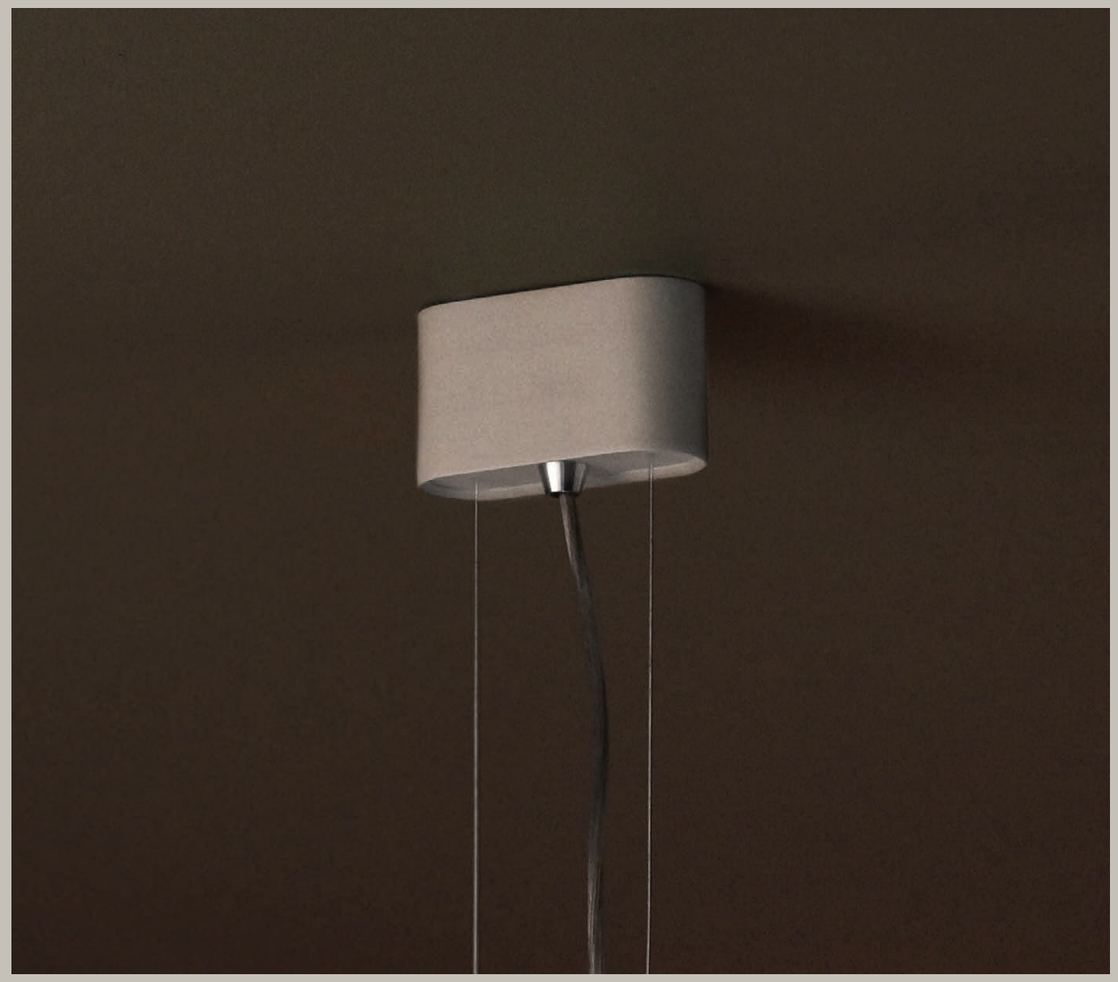

Ogi | 60 Suspended | Sandy

Light gradient

What is special about Ogi is the way it distributes light. The unique, curved shape enables the light to gradually and pleasantly open up. In the Center, the light is strongest and most concentrated, illuminating clearly the area below it. Moving up the curve, towards the elevated ends of the lamp, the light is fading away, creating a pleasant, dimmed light around it.

Ogi | Ceiling box | Sandy

Graphic brilliance

Like a stroke of brush, Ogi table creates a graphic mark on interior space not only with its form but with the way it shines. The table lamp is full of character. Combined with colour it becomes a decorative object on its own. The light in this variant has a special, „dim to warm" option, that allows to regulating the mood of the space. Adjusting light to your needs, the fixture can accompany you at all times during your day and night active life cycles.

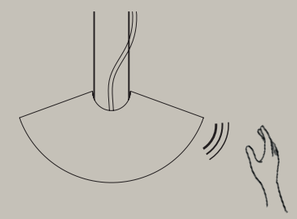

Visual symbol

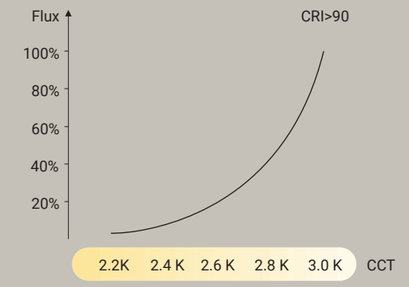

Much like an artist’s deft stroke of a brush, the Ogi table lamp gracefully sets the tone of a space. Its radiant illumination serves as a captivating brushstroke, effortlessly drawing the eye and captivating every onlooker. Its presence isn’t just lighting; it’s an artistic narrative that paints the ambiance, infusing the surroundings with a touch of enchantment and allure.

DIM TO WARM

Looking at our own preferences, we noticed that in general, we expect two functionalities from lighting: strong, bright, natural light for the activity time, and dimmed, soft and warm light for relaxation and recovery time. That’s why we introduced the “dim to warm” touchless light control function, which combines the function of dimming the light combined with the shift of its temperature.
With a simple gesture, we can set the optimum light for the moment - from bright and cool, to dim and warm.

Touchless Control
DIM TO WARM

Ogi
Wall

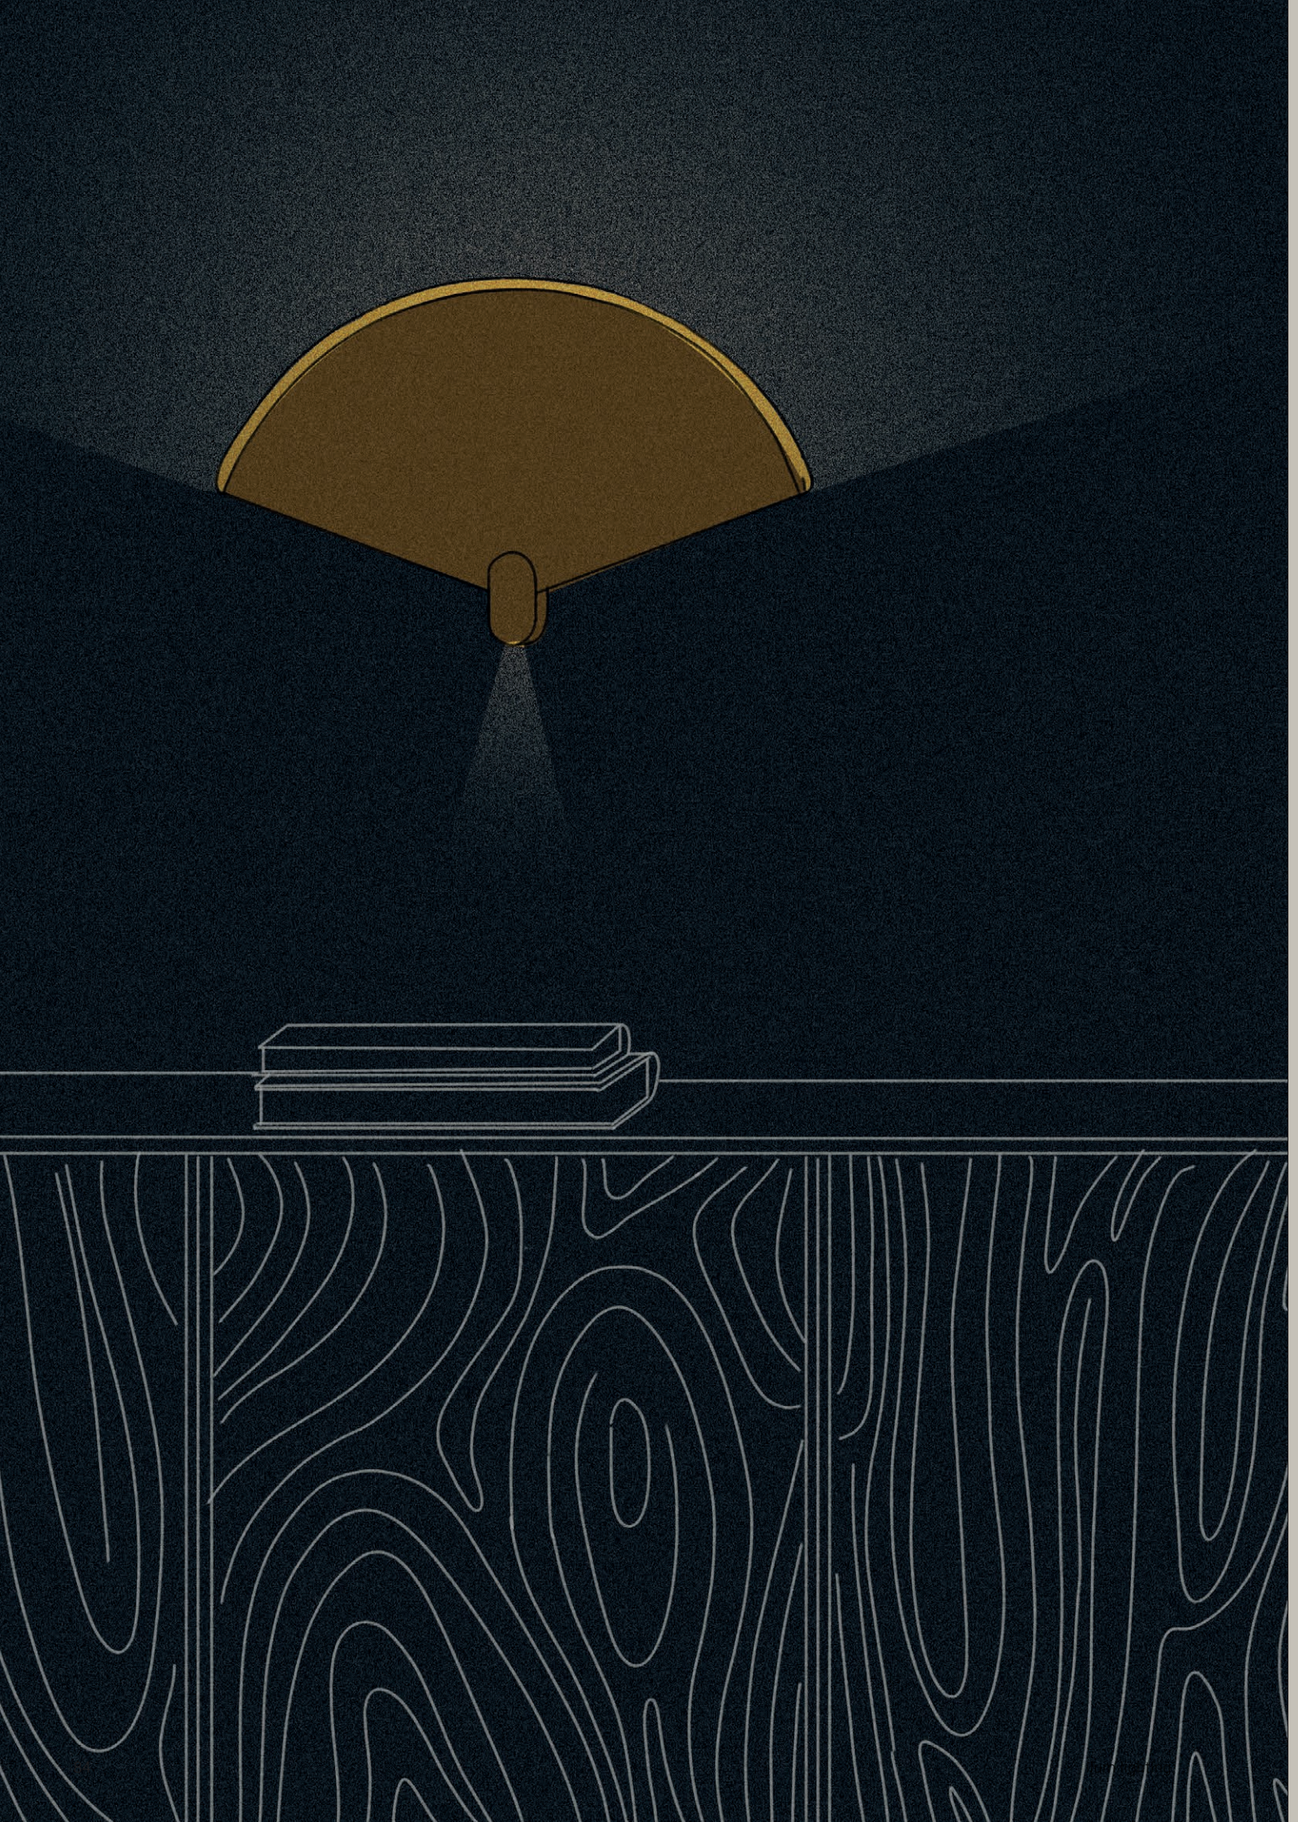

Double charm

The wall scones in two sizes were designed for both home and contract market. The light is emitted up and also down, for both decorative effect on the wall and functional floor illumination.

Single lamp in bold colour will work as a playful object on a wall of a modern living room. Multiplied mini version in toned down shade will serve well in hotel corridors.

Healthy light

Thanks to the low UGR index (<19), glare effects are minimized, ensuring the highest lighting quality and complete visual comfort.

Equilibrium in space

Juicy shades are available in various combinations. Light architectural systems are great for open spaces. Linear solutions are dedicated to straight tables, and a set solution is provided for big round ones. Its versatility extends beyond specific spaces, making it suitable for residential, public, or commercial use.

Wherever applied, Juicy efficiently concentrates light precisely where it's needed, enhancing the atmosphere and functionality of any environment. Its fixtures make a striking visual statement. With a compelling and graphic presence, they not only provide light but also serve as artful additions to any space.

LFO technology

Developed by scientists at the Bartenbach laboratory in Austria, in collaboration with ILUM, the Juicy line of modern lighting fixtures has emerged. Its remarkable strength lies in the unseen, as the light is emitted in a manner invisible to the eye. Through innovative optical design, the light is concentrated in a tiny space, then seamlessly dispersing throughout the room, remaining imperceptible to the observer.

Sleek and classy

The floor lamp shape is a reference to classic solutions. However, the slender leg and the minimalist, conical lampshade is contrasted with the organic form of the Juicy light source. The resulting product is fresh and intriguing, fitting into both classic and contemporary interiors.

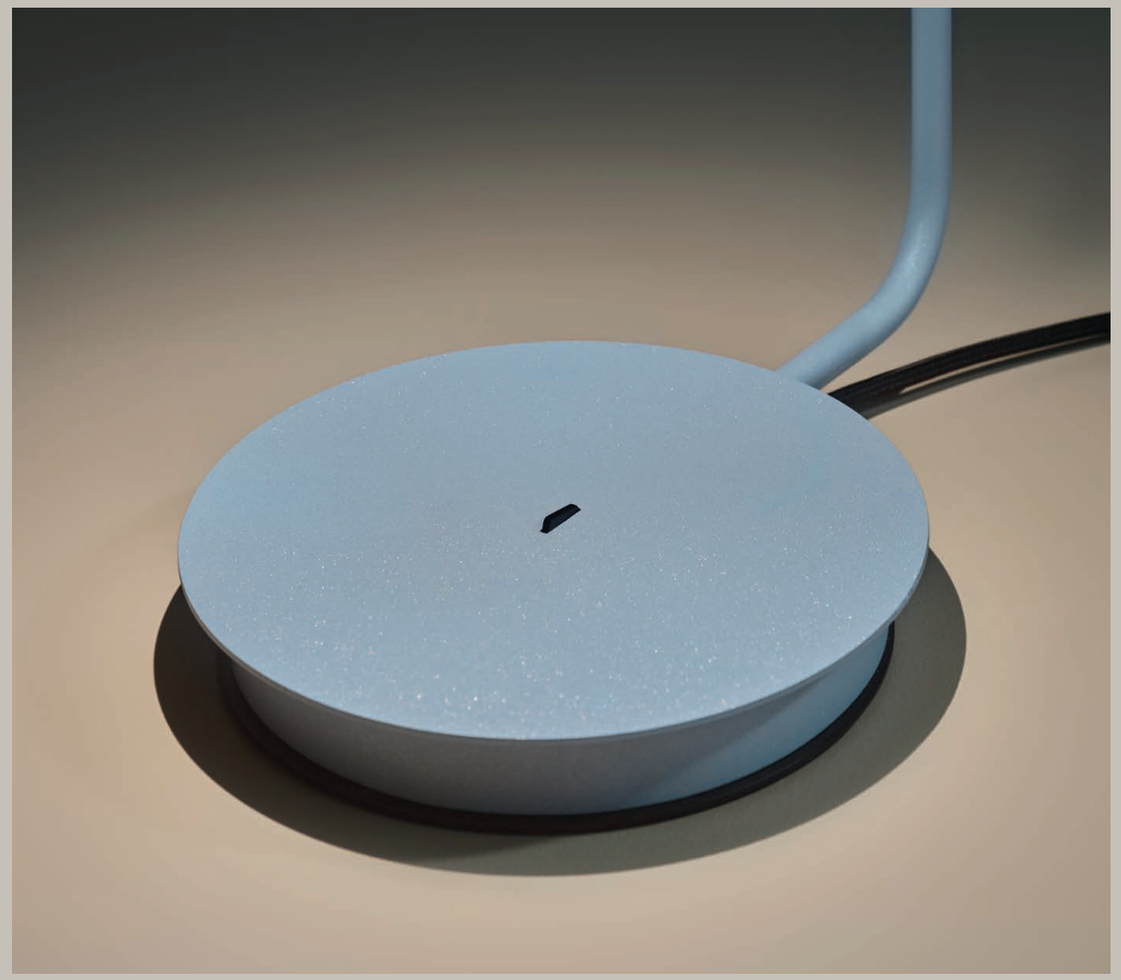

Juicy | Stand | Saphire

Adjustable illumination

Sophisticated design converges with innovative LFO technology. The light source cleverly concealed within allows for a subtle, ambient glow that can be directed to suit your preferences, illuminating your workspace or accentuating treasured objects with precision. Its adjustable feature enables you to pivot the light, ensuring optimal lighting conditions while maintaining an elegant aesthetic. Tailored to the ideal size for tabletop use not only enhances your work environment but also adds a touch of sophistication to any setting, effectively blending practicality with artistic flair.

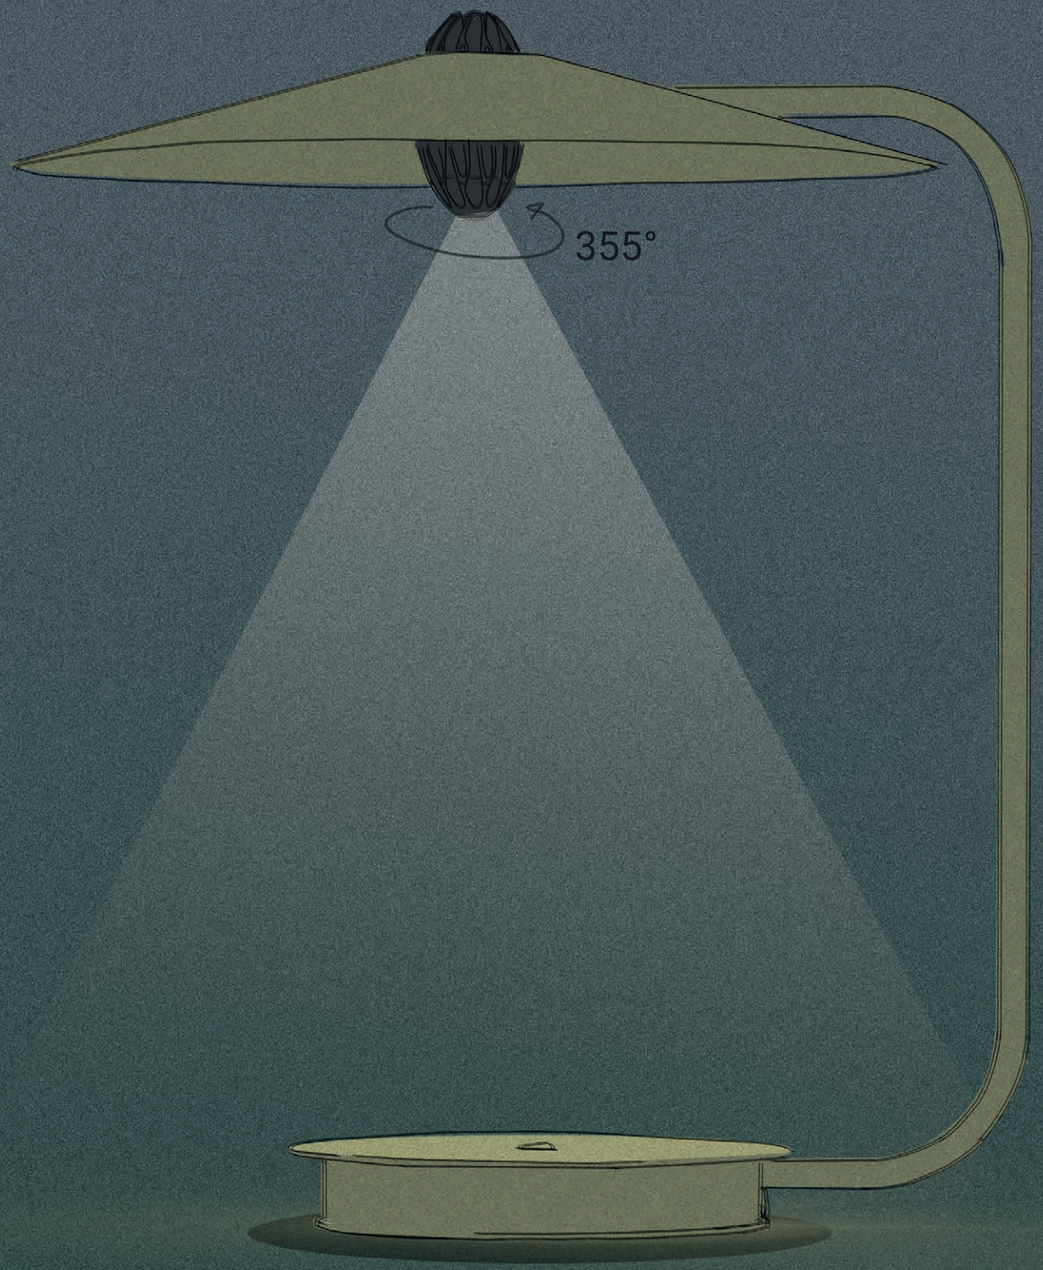

Juicy | Table | Cloudy

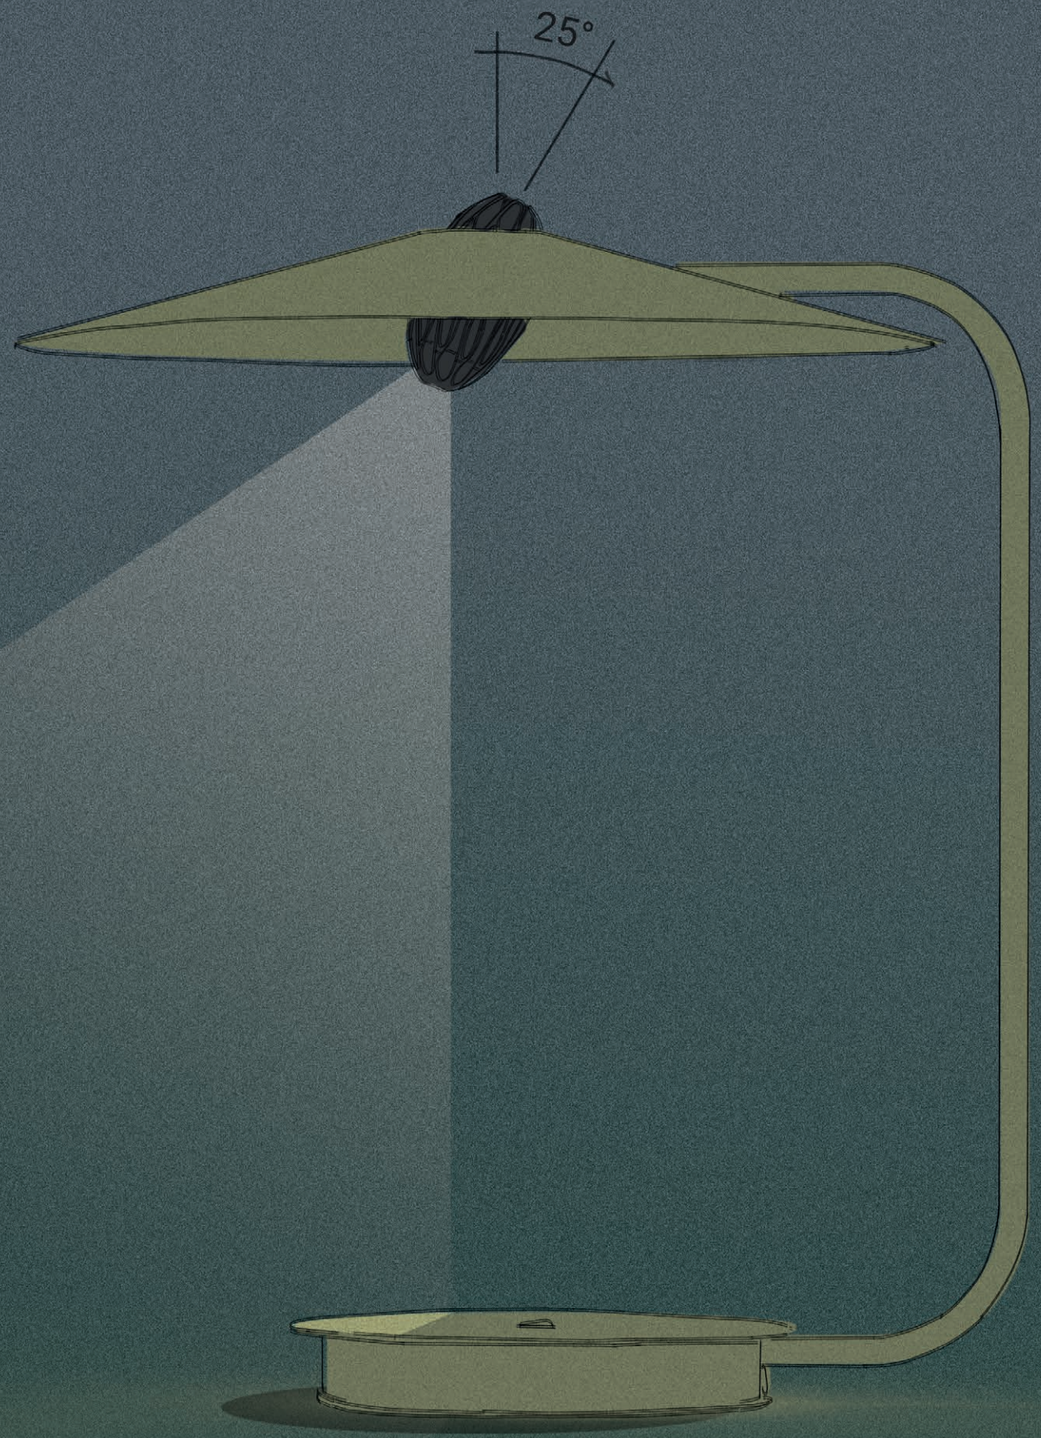

Eye-catching details

Juicy table was crafted with precision and attention to detail, this lamp boasts a sleek design that effortlessly elevates any space. Its high-quality materials ensure durability, while the stunning finish adds an elegant touch to its overall aesthetic. Featuring a sturdy base and an adjustable light source, this lamp offers versatility in directing light exactly where it's needed.

Architectural Illumination

Juicy table isn't just an illuminating fixture; it's an architectural complement that enhances spatial dynamics and ambiance. Its versatile design seamlessly integrates into various spaces, whether adorning a reading nook, accentuating a desk, or adding flair to an expansive living area. Placing Juicy table strategically within a room adds a layer of sophistication to the architecture, emphasizing specific details and creating focal points that draw the eye.

DIM TO WARM

Looking at our own preferences, we noticed that in general, we expect two functionalities from lighting: strong, bright, natural light for the activity time, and dimmed, soft and warm light for relaxation and recovery time. That's why we introduced the "dim to warm" touchless light control function, which combines the function of dimming the light combined with the shift of its temperature.
With a simple gesture, we can set the optimum light for the moment - from bright and cool, to dim and warm.

Touchless Control
DIM TO WARM

Inspiring addition

The wall sconce is an essential part of the family that allows you to fully utilize the available space. Light is emitted both upwards and downwards, providing both a decorative effect on the wall and functional floor lighting. The subtle shape of the fixture will make it a complementary element of the interior. It is perfect as lighting to highlight works of art or as an accent adding sophistication in corridor spaces or waiting rooms.

Rotate and direct

Designed with a distinctive swivel feature, our wall lamp offers effortless rotation, granting you the ability to finely adjust and direct the light as per your preference. This adaptable functionality allows for the precise illumination of particular architectural details or cherished artwork within your room. By easily manoeuvring the lamp's angle, you can curate a personalized ambiance that accentuates the unique elements of your space, adding depth and character to your surroundings.

Karim Rashid

Visionary and prolific, Karim Rashid is one of the most unique voices in design today. With more than 4000 designs in production, over 300 awards to his name, and client work in over 40 countries, Karim's ability to transcend typology continues to make him a force among designers of his generation. His award-winning designs include democratic objects such as the ubiquitous Garbo waste can and Oh! Chair for Umbra, interiors for Morimoto restaurant, Philadelphia and Semiramis hotel, Athens, and exhibitions for Corian and Pepsi. Karim has collaborated with clients to create democratic design for Method and Dirt Devil, furniture for Artemide and Magis, brand identity for Citibank and Hyundai, high-tech products for LaCie and Samsung, and luxury goods for Veuve Clicquot and Swarovski, to name a few. Karim's work is featured in 20 permanent collections and he exhibits art in galleries worldwide. Karim is a perennial winner of the Red Dot award, Chicago Athenaeum Good Design award, Interior Design Best of Year Award, and IDSA Industrial Design Excellence Award. Karim is a frequent guest lecturer at universities and conferences, globally disseminating the importance of design in everyday life.

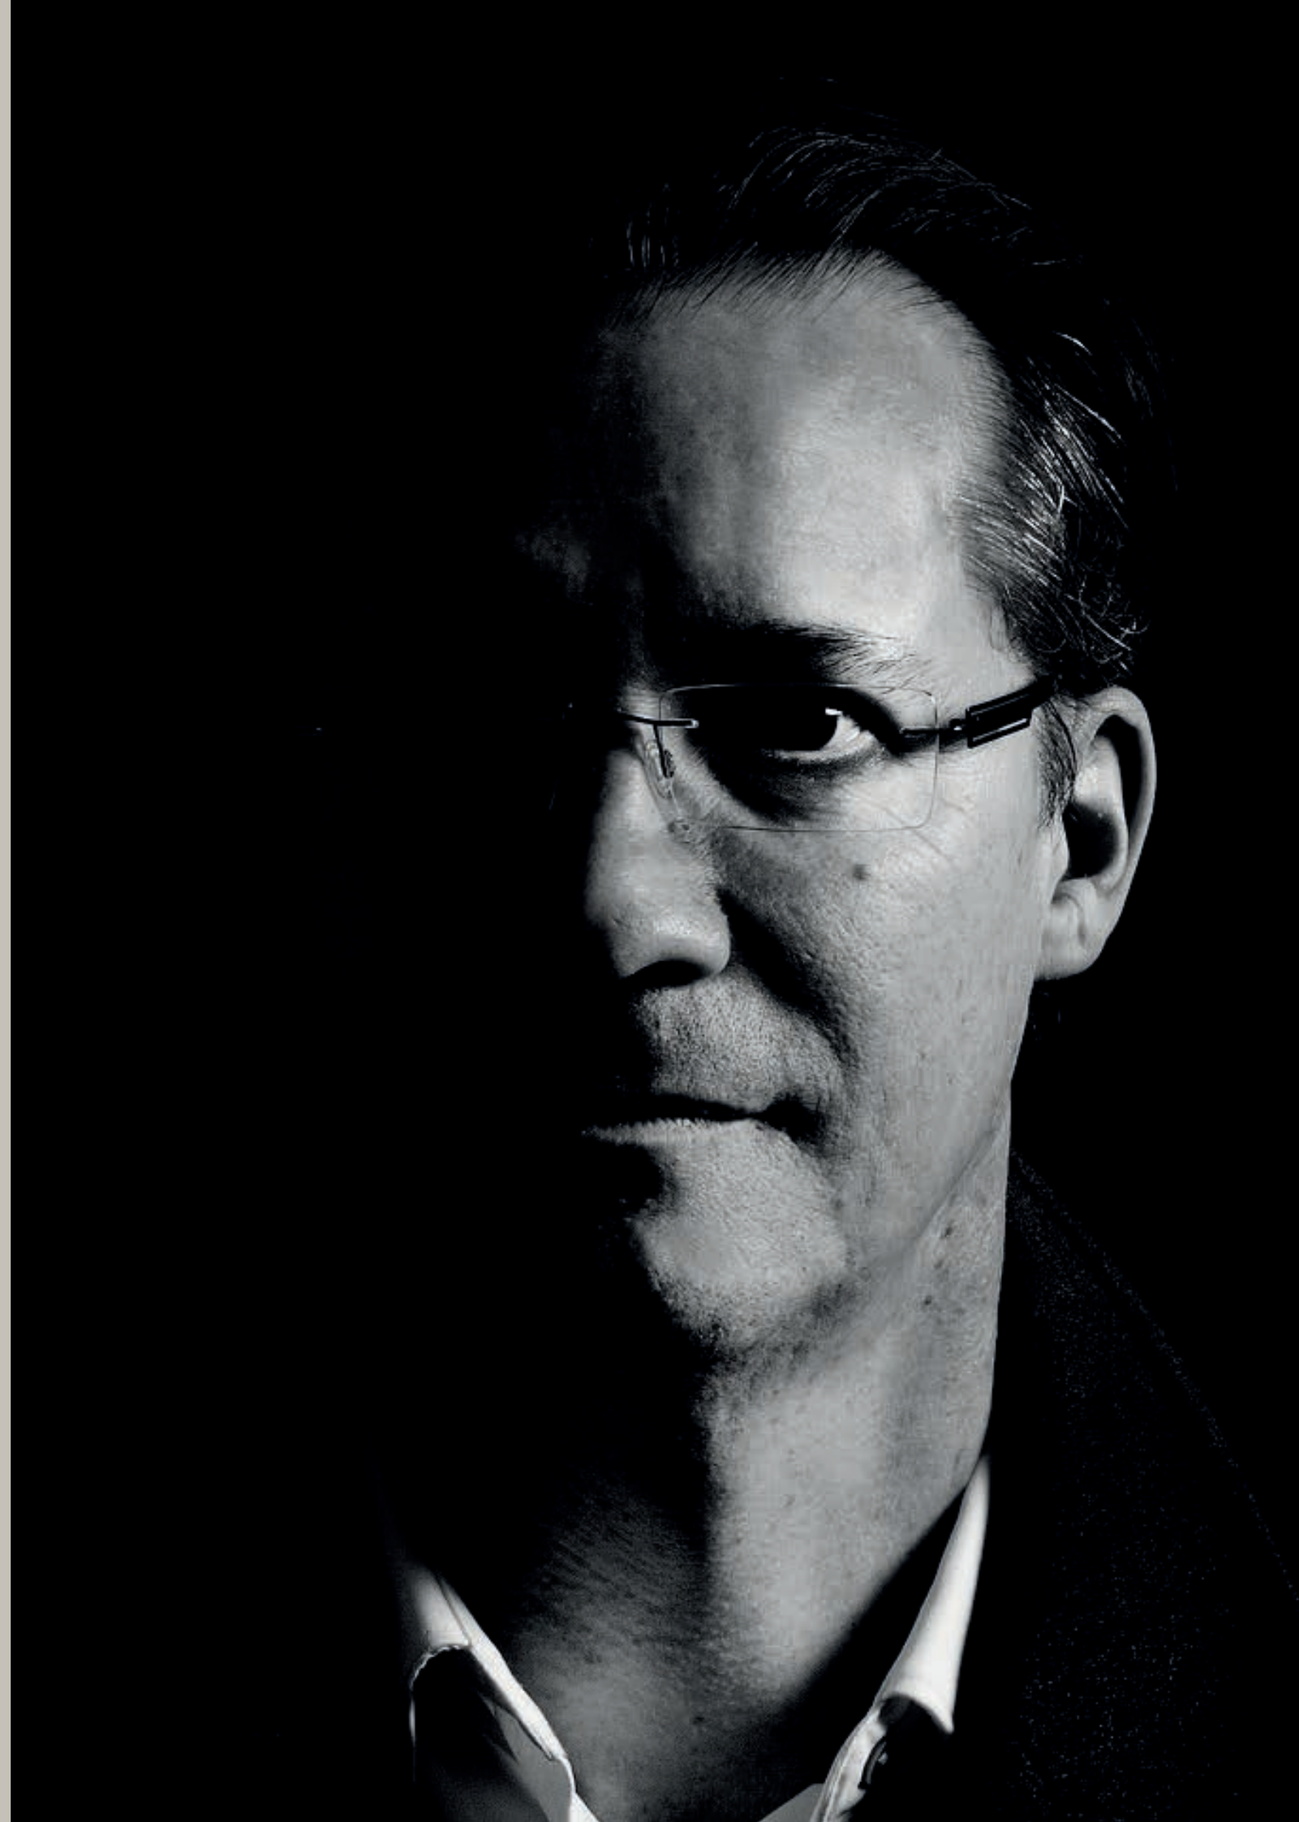

Maja Ganszyniec

Maja Ganszyniec is a designer with a comprehensive approach to the design process. Born in Poland, she studied interior architecture at the Academy of Fine Arts in Cracow before graduating in design product at the Royal College of Art in London in 2008. In 2013, she established Studio Ganszyniec, focusing on human-oriented and nature-friendly objects. In her practice, she combines design that is both visionary and responsible - always looking for new opportunities within the limits of strategic thinking. For the last decade, she has collaborated with brands like Abstracta, Mute, IKEA, Duka, Comforty, or Noti. In 2022, the studio was shortlisted for the Dezeen Emerging Design Studio of the Year award. She is also an owner and founder of an independent furniture brand, Nurt.

Serge Cornelissen

In 1993, newly-graduated architect Serge Cornelissen designs his first lighting fixture at the age of 23. Today, Serge Cornelissen architectural lighting product design has grown to become a renowned design office, whose work is based on the newest led technology, and is being produced by lighting manufacturers worldwide. Besides aesthetics, their concepts include lighting-technical innovation and a thought-out mechanical design. Over the years, many design projects by Serge Cornelissen have been internationally rewarded.

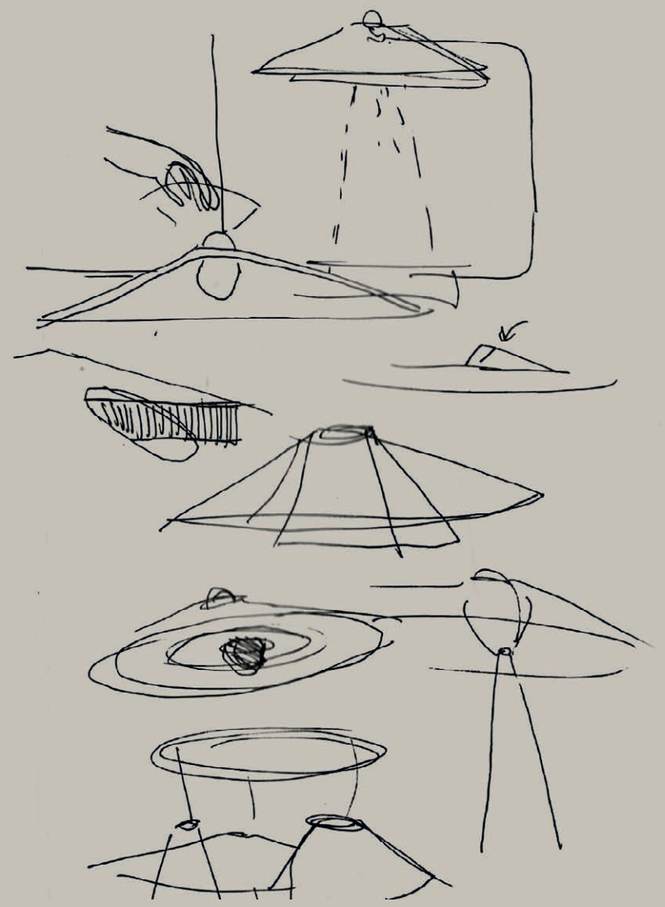

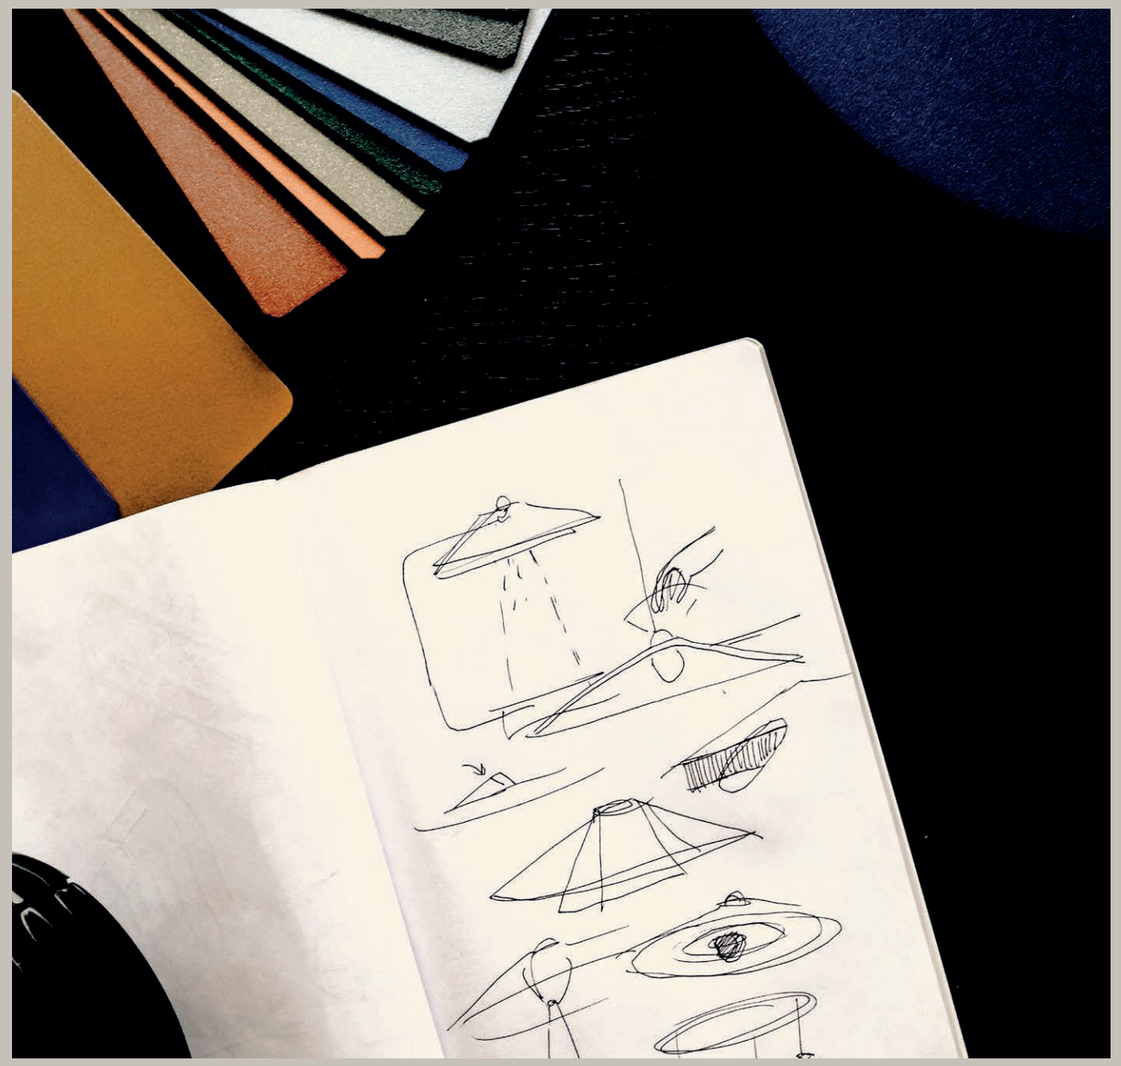

Design Story
with Maja Ganszyniec Studio

On Values

Dialogue with the customer is always important to us. Understanding the values they wish to convey to their audience, what matters for the brand we collaborate with, is crucial. In the case of Ilum, it's about healthy light, human comfort in illuminated spaces. Hence, we've designed lamps that, through their appearance, aim to foster a welcoming atmosphere in spaces—be it homes, offices, or restaurants. Hence, the choice of soft yet precise forms. It introduces light into interiors in a way that's pleasing to the eye even during the day.

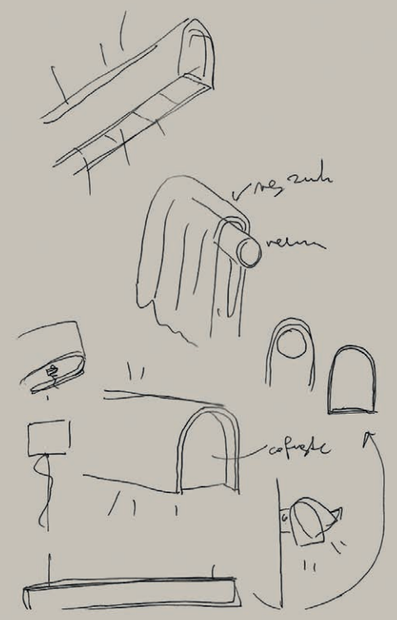

Experiments and Challenges

We had a lot of freedom in the design process. While we based our work on precise guidelines, some assumptions had to yield to creativity. Sometimes technology inspires form, and at other times, the form requires new technological applications. Both teams have years of experience and supported each other in a challenging implementation process.

Light in the Context of Architecture

Light, for me, is one of the fundamental elements shaping architecture. It tells the story of space, helps us understand it, and also influences how comfortable or uncomfortable we feel in a particular place. We've worked on various types of lamps, always aiming to create a functional yet friendly environment. For example, Kamerton was created with contemporary offices in mind, illuminating work tables and simultaneously brightening the room upwards, optically enlarging it.

Unique Character

Each has its distinct feature. Juicy is a nod to classic lampshades. Kamerton is a classic linear lamp but „domesticated" by rounding its top. Ogi is a playful reinterpretation of a lamp constructed on a profile shaped like a fan, maintaining its characteristic, slender profile. However, each family is both warm and precise.

Ilum and Space

These products are for contemporary, domesticated office spaces, stylish hotels, restaurants, cafés, or bars. But they are also for the homes of people who value high-quality design and lighting.

To simplify the decision and the purchasing process, the Ilum offer has been extended to include the possibility to order sample sets of the available finishing materials. As a result, the user is able to see and compare colours and textures available in the Ilum offer to perfectly match the ordered lamp to the interior.
