TAITŌ collection

Taitō (対等) comes from Japanese, meaning “equivalent”, a word that captures
the shape of balancing volumes. That is precisely the visual concept Dan Vakhrameyev had in mind while developing this product.

One of our key principles is a non-standard approach to form, where simplicity is combined with a distinct individuality.
The aim was to create a solid, reliable structure with a comprehensible design, such as a square + cylinder merge.

The initial design of Taitō Poufs was planned as two size models. One supports the other in composition, each equally contributing to the surrounding space.
